## PROFESSIONAL SUMMARY

Results-driven Mainframe and Enterprise Application Developer with 2.10+ years of experience building, enhancing and supporting mission-critical banking and financial services applications at Tata Consultancy Services (TCS). Skilled in COBOL, TAL, TACL, TACL Macro, ENFORM, DDL and SQL across HP NonStop (HP Tandem) Guardian environments, with exposure to Enscribe, NonStop SQL/MP, TMF, EMS, OSS and the FUP, DBUX and SQLCI utilities. Strong in high-volume SWIFT and SEPA payment processing, batch and real-time flows, IBM MQ, RabbitMQ and SFTP integration, and Java, Spring Boot and REST API development across distributed banking applications. Recognised for L3 production support, incident management, Root Cause Analysis, performance optimization and application maintenance and enhancement in Agile Scrum SDLC environments.

## PROFESSIONAL EXPERIENCE

### Systems Engineer

Sep 2023 – Present

Tata Consultancy Services (TCS) | Thane, India

- Engineered and maintained Java-based payment processing systems handling high-volume banking transactions, sustaining 99.9% availability across enterprise banking infrastructure spanning HP NonStop (Tandem) and distributed platforms.
- Optimized batch and real-time payment processing flows for SWIFT and SEPA transactions, achieving an approximate 20% reduction in processing time through performance tuning and code optimization.
- Delivered L3 production support for mission-critical banking applications, resolving critical incidents and reducing downtime by 30% through disciplined Root Cause Analysis (RCA), incident management and corrective action.
- Debugged and enhanced core Java components, measurably improving performance, stability and maintainability of mission-critical enterprise banking applications under ongoing application maintenance and enhancement.
- Designed and implemented reconciliation and settlement modules, ensuring accurate financial reporting and full compliance with banking regulatory standards.
- Integrated IBM MQ and SFTP interfaces enabling secure, reliable and efficient data exchange across distributed enterprise banking platforms.
- Collaborated with cross-functional teams in an Agile Scrum environment to deliver on-time releases, manage sprint deliverables and align delivery with business objectives.
- Contributed to code reviews, unit testing, system testing and CI/CD pipeline execution to uphold code quality standards and accelerate deployment cycles across the SDLC.

## KEY PROJECTS

- Banking Payment Processing System** — Developed and maintained Java Spring Boot microservices for high-volume SWIFT and SEPA payment processing. Built REST APIs, optimized backend performance and resolved critical L3 production issues safeguarding transaction throughput and system stability. **Technologies:** Java, Spring Boot, Microservices, REST APIs, Oracle SQL.
- Enterprise Banking Transaction Management System** — Architected backend services for transaction validation, reconciliation and settlement using Java, Spring Boot and Oracle SQL to ensure data integrity, accurate financial reporting and regulatory compliance. **Technologies:** Java, Spring Boot, Oracle SQL, Hibernate.
- Enterprise Banking Infrastructure Modernization & Test Automation** — Enhanced legacy banking applications with scalable microservices architecture and REST APIs. Contributed to CI/CD automation, testing and controlled production deployments across enterprise environments. **Technologies:** Java, Spring Boot, Jenkins, Docker, Git.

## TECHNICAL SKILLS

- Programming Languages:** Java, COBOL, TAL, TACL, TACL Macro, ENFORM, DDL, SQL, Shell Scripting, Python, HTML, CSS, JavaScript
- Mainframe Technologies:** HP NonStop, HP Tandem, Guardian, Enscribe, SQL/MP, NonStop SQL, TMF, EMS, OSS
- Mainframe Utilities:** FUP, DBUX, ENSCRIBE, SQLCI
- Environment / Platforms:** HP TANDEM, HP NONSTOP, CAIL NODES, RMS, SFTP, RabbitMQ, IBM MQ
- Backend & Integration:** Java 8 (Collections, Streams API, Lambda, Functional Interfaces, Exception Handling, Concurrency), Spring Boot, REST APIs, Microservices, Hibernate, JPA, Apache Kafka, IBM MQ, RabbitMQ, SFTP, Event-Driven Architecture, Spring Security, JWT Authentication, OAuth
- Databases:** Oracle SQL, PostgreSQL, SQL, Database Optimization
- Testing:** JUnit, Mockito
- DevOps & CI/CD:** Git, Bitbucket, Maven, Jenkins, Docker, CI/CD Pipelines
- Methodologies & Tools:** Agile Scrum, JIRA, IntelliJ IDEA, Root Cause Analysis (RCA), Production Support, L3 Production Support, Incident Management, Application Monitoring, Software Development Life Cycle (SDLC), Change Management

## ACHIEVEMENTS

- TCS On Spot Award (2024)** — Recognised for outstanding technical contribution and measurable system stability improvements in high-pressure financial environments, demonstrating exceptional problem-solving and dedication to operational excellence.

## EDUCATION

### MCA (Master of Computer Applications)

Jul 2022 – Jun 2024

Dr. D Y Patil University, Pune, Maharashtra

### B.Sc. Computer Science

Jun 2019 – Jul 2022

Dr. Babasaheb Ambedkar Marathwada University, Chhatrapati Sambhajnagar
